### ACADEMIC LEADERSHIP

**Director, Charles Phelps Taft Research Center, January 2019-present**  
**University of Cincinnati**

The Center is a hub for interdisciplinary discussion and innovation, offering a wide array of university and public humanities programs and opportunities designed to bring people from diverse backgrounds together across the university and the community at large. The Center's ultimate goal is to provide an essential platform to allow deep and diverse discussions and learnings about some of today's most vital and perplexing issues. The Center's transformative work promotes research on humanity across time, languages, and cultures. From scientific to literary research, from studies of identity and society to logic and ethics, student and faculty research provide tools for advances in humanity as well as ways to rethink humanism itself. The Center hosts a series of distinguished visiting lecturers, as well as its own faculty scholars,

who engage in a range of issues that often extend beyond the traditional ambit of the humanities and address issues of both local and global importance. The Center also offers a range of award and fellowship programs such as the Center Faculty Fellows program, Taft research seminars (funding for faculty-initiated interdisciplinary courses), awards and fellowships for undergraduate and graduate students who are conducting original research, and funding for departments to enrich their students' experiences.
